

INSTITUTIONAL RESEARCH & POLICY ANALYSIS

M.S.Ed.
University
of Miami

Beyond acquiring research and statistical acumen, you'll understand how such tools are used to inform decision-making and policy in higher education – the key to success in today's competitive environment.

Develop Strategy, Versatility, and Confidence

Our faculty of scholars and top administrators are from the School of Education & Human Development, Office of Planning & Institutional Research, and divisions of Enrollment Management and Student Affairs.

They instill command of the theory, research, applications to practice, higher education foundations *and* strong communication skills needed by an effective manager *or* a Ph.D. candidate. In addition:

- 4 core courses provide a firm grasp of higher education operations, demography, institutional research, policy, and enrollment management, encompassing components affecting institutional success;
- Another 4 core courses plunge you deeply into applied statistics.

In our required institutional research field experience, students delve into front-line experiences in college and university offices or education agencies, centers, foundations or associations. The 33-credit track also provides a choice of 2 electives from our Higher Education or Research, Measurement & Evaluation programs.

Among outcomes for our graduates:

- 100% are in higher education careers or doctoral programs the semester after the M.S.Ed.;
- The average time to degree is a little more than 2 years;
- A great majority in 2012-2017 said the program provided gains in in-depth knowledge (96%), confidence (96%), and writing and speaking effectively (97%).

“The program was the perfect foundation for a career in higher education, providing the knowledge and experiences that continue to translate to applications in the workplace.”

-- Teerenai Ovathanasin, M.S.Ed. UM, Ph.D. Florida Atlantic University, Assistant Regional Vice Chancellor, Student Success, University of South Florida Sarasota-Manatee

“I learned how colleges and universities operate and how to approach problem-solving from multi-dimensional perspectives. The faculty and site supervisors were top-notch, and many classmates have become my lifelong friends and colleagues.”

-- Karen Connors, M.S.Ed. UM, Ph.D. University of Virginia, Director of Executive & Certificate Programs, UVa McIntire School of Commerce
